the **cambro**®story

When William and Argyle Campbell first opened the doors at Cambro Manufacturing in 1951, their goal was to make a hospital meal tray of the highest quality possible. Named the Camtray®, it demonstrated that they were as committed to excellence in the food service industry as they were to the quality of their own products. As 2016 marks the company's 65th year of leadership in quality, innovation and customer service, today Cambro serves the world with the industry's most complete selection of products for widely diverse segments of the food service business.

Since 1951, the company has experienced many changes including a greatly expanded product line, new methods of manufacturing and distribution, and an increased emphasis on topics like environmental responsibility. From a single factory in California, Cambro has grown to become an international presence with production facilities and sales offices in the United States, Europe, the Middle East and Asia. But the original guiding vision of the Campbell brothers remains unchanged: to create and provide the most innovative, durable and highest quality products for the food service industry. Now led by William's son Argyle, Cambro is still dedicated to meeting our customers' needs, and equally committed to helping you serve, satisfy and delight your guests.

At the heart of our business philosophy is our willingness to listen, so in a very real way we owe all our success to you, our customer. Our longevity in a very competitive field for over 65 years certainly proves the value of that philosophy, and we are proud to have earned the loyalty of customers of all sizes and in all segments of the industry. From hotels to healthcare to caterers, from restaurant chains to educational facilities, we understand the food service business and we design and create our products with the end user foremost in mind. Our goal is to provide our customers the best possible value on products that are durable, save labor and increase food safety, so you can offer your guests a superior experience while enhancing profitability.

Cambro is uniquely committed to investing in the people and processes that make our products a reality. We're proud that children and grandchildren of some of our first employees are with us today, and of the dedication to quality and service of our entire family worldwide. We continually work on developing new ideas for specific industry segments, and invest in new tooling and leading-edge machinery to bring these products to market. We persistently strive to improve our manufacturing methods to be more efficient in terms of process and materials, to keep costs under control while keeping our planet healthy. And we constantly seek to maintain quality and value despite rising costs of transport and raw materials, the need to reduce environmental impacts, and the demand of end users for total order accuracy and responsive service across a global market.

From once offering a single product, the Camtray, over sixty-five years ago, today Cambro offers a wide range of trays, table service and display items, storage, shelving, merchandising and insulated transport products, as well as innovative warewashing systems and healthcare meal delivery solutions.

The future is certain to bring great changes to our industry. Yet one thing that will remain a constant is Cambro's tradition of continually developing new products that help food service operators save time and money, increase sales, reduce labor and improve service. In the years ahead, guided by the commitment of its founders to innovation, quality, and value, Cambro Manufacturing will still be the leader in serving the food service industry and you, our valued customer.

High Density Mobile Units

Stationary Unit
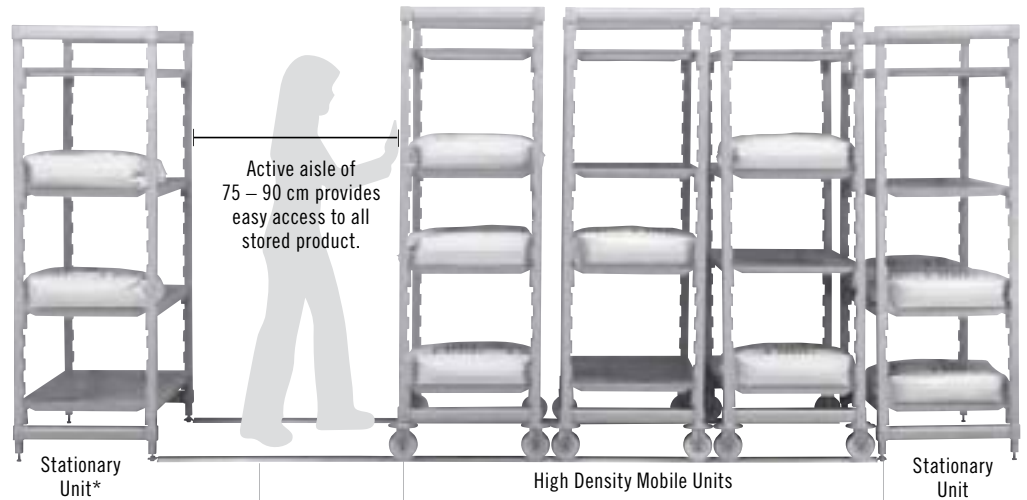

Only available from Cambro European Logistics (CEL), Germany and Cambro Özay Turkey.

Raised Floor Track provides a smooth and level surface to easily roll mobile units. Raised track ensures dirt will not get trapped and is easy to clean. Aluminum track and stainless steel hardware are rust resistant.

*It is recommended to use a stationary unit for every 4,5 m of track to further stabilize the system.

Grooved casters roll easily and securely on raised track.

Raised track connects easily to the bottom of a stationary unit that works as a system anchor. No bolts, no glue or drilling into the floor are required. Easy and fast set up.

WHY CHOOSE ELEMENTS?

Made from a revolutionary, extremely strong composite material with a smooth, easy to clean surface. Elements Series is stronger than common wire shelving. It's lighter in weight than Camshelving Premium Series and totally impervious to moisture, chemicals and liquids that can destroy shelving over time. Elements Series is designed for medium to heavy storage use in freezers, coolers, dry storage or warewashing areas. It easily supports the performance demands of a busy foodservice operation.

WHY CHOOSE BASICS PLUS?

Just because the budget is tight and storage needs are less rigorous, it doesn't mean that shelving performance and storage efficiencies should be compromised. Basics Plus Series is made from the same high performing, strong composite material as Elements Series and has the same design features. It's lighter in weight and less in cost but still strong enough to handle light to medium storage demands.

CHOOSE THE RIGHT TRAY FOR YOUR BUSINESS

Cambro is the global leader in manufacturing trays for the food service industry, offering the largest selection of materials, sizes, colors, shapes and personalization processes. Cambro's breadth of assortment provides the clear choice for the right tray for every need and budget.

Consider the following to select the right tray for your operation:

In order to choose the correct tray, first identify the correct application.

Service Tray

Used by employees to carry items to serve to guests:

Step 5: Personalization

Cambro offers high quality personalization on most of the trays that we manufacture. Look for the personalization logo throughout the brochure.

Why Cambro® Healthcare?

For over 60 years Cambro has been focused on developing innovative solutions to the toughest challenges in the foodservice industry. Cambro Healthcare products are designed to perform consistently under the most demanding conditions of healthcare foodservice.

The Components for Successful Meal Service and Patient Satisfaction
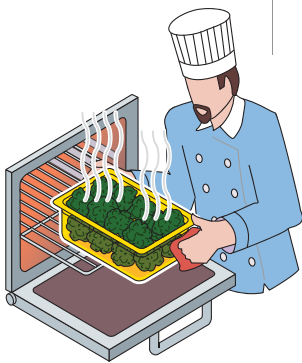

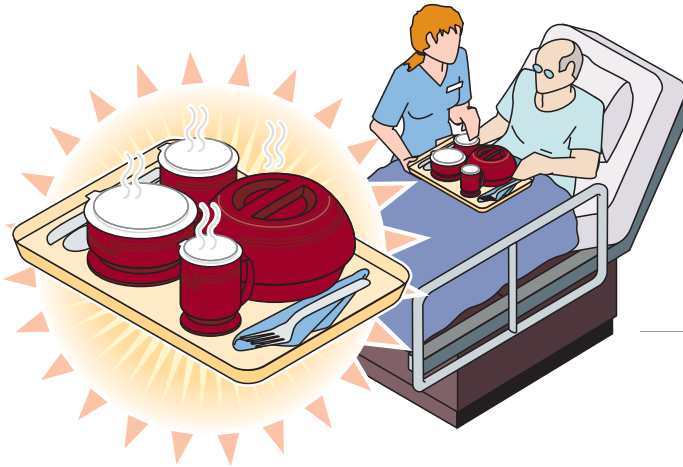

Hot Food

The goal of any meal delivery system is to keep food hot and fresh. Safe food handling and preparation are the first steps.
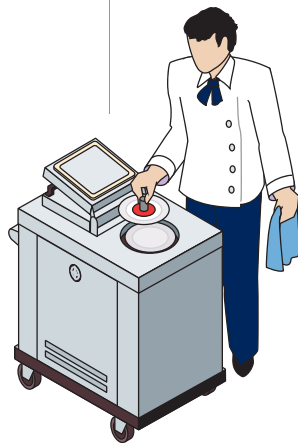

Hot Plate

Hot plate needs a plate heated to 85˚-90˚C. A plate that is not heated diminishes food quality for patients.
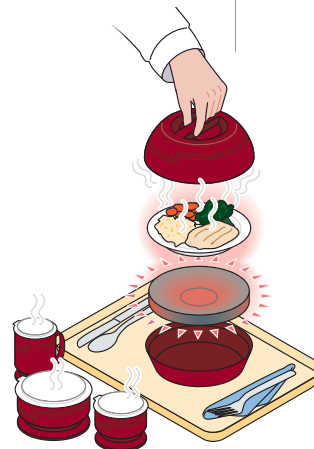

Temperature Maintenance System

Innovative Camduction® heat retention system charges the bases to 75˚-85˚C fast and efficiently for any facility with a hot tray line system.

Meal Transportation

From meal delivery carts to individual Tablotherm meal transport systems, these products can extend the heat retention of the meal to the patient's bedside.

Tablotherm Pellet System achieves temperature retention of 64˚C for 2 hours.

CAMDUCTION® COMPLETE HEAT SYSTEM – HOT MEAL DELIVERY SYSTEM

Camduction innovative hot meal delivery system is fast and efficient. Camduction is perfect for any facility with a hot tray line system. One charger can accommodate up to 300 meals per service.

Camduction Charger covered by U.S. Patent 8,263,906 B2. Camduction Base covered by U.S. Patent D630,897 S.
....
